SAMSUNG

51-Bottle Capacity Wine Cooler

Installation Specifications

1. Measure the height, width and depth of the opening, making sure to include baseboards, molding tile, countertop overhang, etc. Check to be sure there is enough room to open the door (consider walls, islands or other obstacles when measuring).
2. Refer to illustration below to determine dimensions.
3. It is not recommended to install the appliance in a corner or directly beside a wall. The door will need to be opened more than 90° to allow full extension of the shelves. If it is necessary to place the unit next to a wall or in a corner, leave at least 3 3/4" of space between the wall and the appliance to allow for the door opening.
4. Allow 1 1/16" minimum clearance at rear for proper air circulation and electrical connections. Allow 1/8" minimum clearance at each side and top for ease of installation.

The listed depth requirement is assuming that the electrical outlet is located in the adjacent cabinet or flush mounted in the rear wall, not surface mounted inside the enclosure. If the electrical outlet is located inside adjacent cabinet, cut a 1 1/2" diameter hole to admit the power cord. If the cabinet wall is metal, the hole edge must be covered with a bushing or grommet.

Please note: The following dimension and cutout information is for planning purposes only. For complete installation details, consult manual packed with product or download manual online at samsung.com.

Cooler Capacity: 51 Bottles

- Adjustable Temperature Zone: 41°F–64°F
- 5 Full-Extension Shelves
- High-Efficiency LED Lighting

Warranty

One (1) Year Parts and Labor
Five (5) Years Parts and Labor on Sealed Refrigeration System Only*
Ten (10) Years Parts and Five (5) Years Labor on Digital Inverter Compressor Only

*Compressor, evaporator, condenser, drier and connecting tubing.
